DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Mertol (5,866,943). Mertol discloses a method for manufacturing a package for accommodating electronic parts, comprising: forming a buildup substrate having: a core substrate (Figs.1-3 el.22), a power source and/or a ground layer (col.10 lines 35-37) on said core substrate, a buildup interconnecting layer (el.32,13,14), and signal lines (col.8 lines 43-47) on said buildup interconnecting layer; adhering a stiffener (el.24; col.8 lines 48-50) to said buildup substrate with a conductive adhesive layer using a conductive adhesive (el.36); and forming a grounding plane using said stiffener and said buildup substrate (col.10 lines 29-37). Mertol also discloses fixing said conductive adhesive layer at a ground potential (col.10 lines 29-37); providing a plurality of ground connecting pads (el.14) on said buildup interconnecting layer, and connecting (el.16) said conductive adhesive layer (el.42) having mainly a conductive adhesive to said plurality of ground connecting pads; and providing pads connected to said grounding

plane on the surface of said buildup substrate as well as electrically connecting said pads to said conductive adhesive layer (col.10 lines 29-37).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
